1.4 – Feedback System

1.4.1 – Whether structured feedback received from all the stakeholders.

Students	Yes
Teachers	Yes
Employers	Yes
Alumni	Yes
Parents	Yes

1.4.2 – How the feedback obtained is being analyzed and utilized for overall development of the institution? (maximum 500 words)

Feedback Obtained
Curriculum is designed and revised periodically on the basis of regular reviews of student performance, user feedback, assessment performance analysis. We also emphasize on innovation, effective implementation, evaluation of student learning, and the college strives its best to regularly provide new curriculum options that leverage the interactivity and engagement potential of online resources. We always take into account of the students' wide range of learning styles and needs. Decisions about improvements and updates to curriculum are also guided by feedback from a variety of critical stakeholders: teachers and administrators, students and parents, employers and outside evaluators such as accreditation organization and sponsors. This feedback is collected semester wise and annually in a variety of ways, including the print form and online. We also receive third party evaluation on the curriculum. We adopt the following methodology for Curriculum Design and Revision: A. Analysis: Prior to course development, a thorough needs analysis is carried out. Feedback on current courses from student academic performance, and state national standards

alignments from the basis of the analysis. B. Design: While designing the curriculum, the members of the board pay attention to the set of standards: i. Instructional strategies ii. Content, and iii. Visual and technical design of the course. Enough focus would be paid to the role of technology, the level of student engagement, and student learning styles. C. Development: The members begin with a course map, course objectives, unit by unit course development and revision, content analysis and review. Procedures of r ensuring internal consistency, bias free content and assessments, instructional effectiveness, and the appropriate use of intellectual property are implemented throughout the development phase. D. Implementation: Course are created, evaluated and modified by teachers. When courses are completed, they are revised and updated. E. Evaluation: The intent of the evaluation phase is to determine the level of student success, and the impact of the course design on student performance. Evaluation occurs throughout the delivery of the course and includes student performance, internal lesson and assessment analysis, and feedback from students, parents, teachers and employers. 4.0 REVISION Revision of the curriculum is done in every three years. During this threeyear programme cycle for UG and twoyear programme cycle for PG, semesterwise, yearly and midway revisions are carried out. The Dean, Academic Affairs in consultation with IQAC coordinator may devise appropriate formats for getting the feedback from all the stakeholders from time to time.

5.3.2 – Activity of Student Council & representation of students on academic & administrative bodies/committees of the institution (maximum 500 words)

Our college has an active and functional student council. This council is constituted at the beginning of every academic year. It has been functioning on the noble principles of Democracy. Each and every student is helped to know the importance and values of democracy along with the style of its functioning which enables the students to become the leaders of our nation. Student's representatives are elected classwise and the elected representatives elect their Chairman, Secretary and other office bearers. Apart from this student's council, literary association and department associations are also functioning with the office bearers elected by the students concerned. Students council is

actively involved in organizing various programmes in the college such as Freshers' day, Sports day, College day, Cultural festival etc., Staffincharge of the associations coordinate the office bearers and train them in such a way that they would organize and conduct these functions successfully. Budget for each program is decided in consultation with the Principal and office bearers.

Planning and execution are carried out accordingly. Thus the students are helped to focuss on leadership qualities and managerial techniques. The meeting of the students council is convened 2 to 3 times in a semester to discuss and pass resolutions on the following: 1. Student - centric issues raised by the students 2. Infrastructure facilities 3. Conducting of Sports day, College day, Literary association meeting. 4. Conducting cultural events. 5. Celebration of festivals like Pongal. In case of literary association, the secretary and other office bearers arrange meetings periodically in Tamil or in English literature with the eminent scholars from various parts of Tamil Nadu. The student representatives also play a very vital role in various Board of Studies, Academic Council, anti ragging committee, students grievance cell, placement cell etc., They are also equally involved in planning for NSS activities on the campus and off the campus, Rotaract services, Youth Red Cross, Red Ribbon Club, NCC.

5.4 – Alumni Engagement

5.4.1 – Whether the institution has registered Alumni Association?

No

Alumni are the backbone of our college and play a major role in their Almamater development. Many distinguished alumni are working at higher level in companies and government sector. Many have become successful entrepreneur. Alumni are connected to the college in an enormous way and throughout the year. Alumni are engaged in following ways to the Institution: 1. Curricula discussion framing 2. Panel discussion 3. Project mentoring 5. Department student topper award 6. Guest lectures 7. Career guidance 8. Entrepreneurship development 9. Placement and internship support Alumni are actively involved in the curricula development by giving their inputs based on practical experience through in representation Board of studies at their respective department. Panel discussion on topics such as recent development, job opportunities and requirement, state of the art information helps a lot for updating student's knowledge. Alumni are playing an active role by participating the Academic Council and Internal Quality Assurance Cell (IQAC) and contribute to the academic endeavour of the college. Continuous guidance and support have been provided by the alumni to the department students by conduct of Guest lectures, sessions on different topics such as technical and HR interview preparation, Group discussion etc. Group of Alumni are also engaged in conduct of mock interview process for the current students and mentoring them for improvements. Placements, Job oppturnities and internship support provided by the current students encourage a lot as alumni are at higher position and entrepreneur. Career guidance lectures taken by alumni e.g. competitive examination preparation, guidance regarding the higher studies opportunities in foreign universities like US, Germany, Japan helps a lot to understand the admission process and other formalities about the study. Alumni Association is in a growing stage with a vision to involve the alumni for institute and students interaction to provide financial help to weaker students, Lab development etc. Every year alumni meet is planned at college level in December which will provide an open platform for discussion with faculty, parent students and Alumni.

Irrigation is being done wrong liquid wastes in hostels as well as in the campus. ? Rainwater hare wasting is having practiced by collecting all water in a storage tank with a capacity 50,000 liters.

7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Institutional Two Best Practices 1. ACADEMIC AUDIT 2. VERMIBIOTECHNOLOGY ACADEMIC AUDIT The continuous progress of the College is monitored through an annual external academic audit conducted by the Internal Quality Assurance Cell (IQAC). Objectives of the practice: ? To encourage the faculty to aim constantly at quality and sustenance activities. ? To help the teachers, in all departments to use innovative methods in their classroom teaching and learning process. ? To encourage faculty to improve their professional developments. ? To develop research culture at the grass root level. ? To review the functioning of departments, associations and facilities. ? To identify the strengths and limitations of the department. The Context: Annual Academic Audit

is introduced by the college to reinforce the healthy practices of the college with suitable mechanisms to identify and reform whether the goals and objectives of the college are being implemented successfully. The notion of conducting academic audit is to assess the academic performance of staff in particular and departments as whole. Specifically, the audit is conducted on the basis of criteria wise as suggested by the NAAC. Issues identified were curricular designing and development, teacher quality and profile, performances of students, innovative methods in teaching and learning process, academic progress of the department, professional developments of staff, research and extension activities conducted by the department, students support activities, best practice of the department and so on. In view of this exercise, the strength and limitations of the department can be identified and suitable measures are suggested. This practice develops a healthy competition among the members of faculty of each department and also among the departments. It is to be ensured that students graduating from the college are groomed to master any set of skills or knowledge. They are trained to maintain a high standard with their counterparts in urban. The Practice: ? Academic audit committee is being constituted with external expert, Principal and coordinator of IQAC. ? Once the committee is constituted, the date and time of the academic audit will be informed to the respective departments well in advance. ? A department evaluative report in duplicate has to be kept ready based on the format evolved for audit one being the selfstudy report of the department and the other for the individual teacher profile. ? The departments are expected to be prepared with the following documents and display them before the Academic Audit Committee. a. Curricular aspects b. Teaching, learning and evaluation methodology adopted in the department c. Research and extension details d. Student support activities e. Best practice of the department ? At first Head of department or coordinator of Micro Quality Assurance Cell(MQAC) presents the activities of the department. Then the members of academic audit interact with each member of faculty with regards to programme and courses various concepts of the courses taught and also go through all their records and credentials. ? At the end, the committee evaluates the whole departments' academic performance. A report is prepared with the significant contribution of the members of faculty. Hard copies of the reports duly signed are being sent to the IQAC. IQAC after due verification sends the report to the Principal. The reports of audit team will be finally sent to the concerned Heads of the Departments for their perusal and further course of action. Evidence of Success: After conducting the academic audit regularly, it has been found that a significant improvement of the individual faculty with regard to attending seminars, publishing papers, undertaking consultancy, organizing seminars / workshops, maintaining records etc. Further the performance of departments is remarkably accomplished. Student support activities, student progressions and placement activities are considerably increased. Problems Encountered and Resources Required In view of continuous internal assessment of students, teaching schedule, research and extension activities and examinations related duties make the teacher unable to collate the data and write the self study report. Clerical assistance was not available. The teachers has to adopt/familiarize new technology/gadgets to get their work done easily. Resource required ? Human Resources collect information to process and collate. ? Financial assistance for stationary and other miscellaneous items for preparing reports. ? Technological resource Use of computers and other modes of data processing. ? Material Resources - Paper and stationary items for preparation of audit. Notes: The IQAC develops standards for the various administrative and academic functions of the college. It also orients and trains staff members existing and new entrants on various issues and changes in higher education. The IQAC sheds responsibilities and works in a team at all levels of the hierarchical structure. In particular IQAC has introduced quality circles in department level by forming Micro quality assurance cell (MQAC)

VERMIBIOTECHNOLOGY 1. Title of the Practice: Vermibiotechnology 2. Objectives of the Practice: • To convert plant origin wastes from our college campus and animal origin wastes particularly, cow dung into vermicompost in order to maintain a litter free campus all through the year • To evolve and develop ecofriendly and novel technologies for restoration and improvement of soil health through Vermiboitechnology • To increase crop productivity through the utilization of vermiproducts viz.,Vermicompost, Vermiwash and Vermitea as one of the agroinputs • To disseminate the developed novel technologies to farming community and interested students of our college for adoption in their crop fields in order to increase crop yield for meeting out the evergrowing demands of food grains • To create and sustain pollution free environment for the present generation and posterity. 3. The Context: Earthworms have long been described as the intestine of the earth, friends of farmers and so on, because of their manifold useful functions in the soil. Recently, earthworms are recognized as one of the bioreactors due to their ability to degrade organic waste materials and convert them into a useful product called vermicompost. The technology is described as vermiculture technology or vermibiotechnology. Due to human population explosion beyond the limit and rapid urbanization in India, total agricultural land area is decreasing day by day. It directly affects the crop production. Although, the usage of various chemical fertilizers and pesticides are reported/presumed to increase the crop yield many folds, but their excessive and indiscriminate usage cause tremendous alterations in natural soil environment. In order to cope with this trenchant problem, the vermibiotechnology has become the most suitable remedial alternative and low cost technology of the day. Earthworms are present in almost all terrestrial ecosystems, and are one of the most important components of the soil invertebrate macro fauna. Approximately 8,300 species of Oligochaetes have been described (of which more than 5,700 are valid species), in 38 families and 811 genera. Roughly 50 of these (around 4,000) are Megadrile earthworms. In India, 590 species of earthworms with 69 genera are reported. These earthworms can be cultured or used in composting by adopting simple procedures either in pits, crates, tanks, concrete rings or any containers. Organic materials from plant and animal origin are to be used only after preprocessing or predigestion as food materials for earthworms.

Institution in one area distinctive to its vision, priority and thrust
Empowering the rural and underprivileged students Community through broad based education Nehru memorial College is located in rural area and the students population mainly hails from socially disadvantaged and economically weaker sections of the society, who can get entitled to dignified survival only through higher education and employment. Hence, it has become essential to nurture and sharpen the talents of every student and to offer them a broad-based education with deep knowledge in the chosen discipline and broad general education in other areas. Our is a one stop destination for all the educational needs, career options and life solutions of the students. It is a life changing destination for students. Our college is a trend setter and game changer of higher education in this region. For instance we offer B.Sc. computer science in the year 1983, M. Sc., Applied Physics 1983, UGC Innovative programme - M. Sc., Embedded systems in 2013 and M.Sc., Data science in 2018. Education is redefined in the college, based on current global trends in territory

education. The college uplifts the student community by offering a global, holistic, broad-based education, which include Integrated Learner- Centric inter-disciplinary education through Knowledge Empowerment and Integrated Skill Development Programmes. The knowledge empowerment in broad-based education involves blending the curriculum into a whole learning experience, by integrating with Education of deep knowledge in the discipline of study and broad knowledge in the general education. The teachers sharpen the mathematical intelligence and linguistic fluency of each student. The teachers identify the uniqueness of each student and help them to excel in that domain. Knowledge empowerment Utilizing the academic freedom of Autonomy, the College develops curricula to suit the needs of the students with relevance to local/regional National/Global requirements. Taking students beyond academics, it involves them in various interactive skill-development strategies to develop their higher order:

- Writing assignments on issues related to the subject and at the sometime having contemporary relevance accelerates students' creative thinking and conceptualizing skills
- Taking Seminars with PPT develop their Synthesizing and Presentation ability
- Students' interacting with experts during Seminars/Workshops/Conferences promotes their analytical and application knowledge
- Industrial visits, study tours, field visits enable students gather insights on Industrial Practices and latest technologies that promotes students' questioning and reporting skills.
- In model making sessions, students' finding their own solutions stimulates their problem solving stragics.

Enhancing Communication skills Since majority of the rural students are first generation learners, lack of competence in communication skills in English is their major challenge. Nehru Memorial College makes efforts developing their communication skills in English. ? Several clubs and mentoring programme are organised to develop communicative skills in various levels. ? MoU with CSR@ Redington, Chennai has enabled students receive professional training on Soft skills. ? Group discussions and brain storming sessions conducted on controversial topics encourage the process of free thinking, boosts up students' self-confidence and promotes their communication skills

Videos, Documentaries and Films are screened and students

8.Future Plans of Actions for Next Academic Year

Plan of the actions next academic year

- Organizing Faculty Development Programme in respect of theme on outcome based education
- Conducting Faculty Development Programme for NonTeaching staff to update their skill oriented Programmes
- Encouraging Research and Development Activities
- Strengthening Students Club, Departmental Association, Mentor, tutorward system
- Updating college website
- Enhancing placement activities and career guidance programme
- Conducting Academic an Administrative audit with external expects
- Preparation of NAAC SSR
